Rowe Show Cattle Feeds contain Bovamine Defend live bacteria

THE PROVEN PROBIOTIC

Bovamine® Defend™ probiotics are the most widely used and most thoroughly researched probiotics in the cattle industry. Bovamine® Defend™ is a unique living probiotic that stabilizes rumen and small intestine digestive functions while stimulating natural and healthy digestion by reinforcing and enhancing the animal's natural defenses against harmful bacteria.

BENEFITS OF ROWE SHOW CATTLE FEEDS WITH OMEGA-3 FATTY ACIDS SUPPLEMENTATION

- Recent research at two major university's and others using Omega-3 supplementation showed a boost in animal reproduction, reduced mortality in offspring, eased weaning and shipping stress and showed improved marbling and carcass grades.
- Breeding stock increased first-service conception rates in dairy cattle.
- .1 to .3 increased gain in feedlot cattle.
- Has anti-allergic properties, encourages a strong metabolism.
- Reduced inflammatory Responses, found to support Immune function, promotes hoof health and boosts the immune system.
- Repairs and maintains cellular walls, Anti-inflammatory-can act like Bute without the negative side effects.
- Can help calm temperament, maintains supple joints, assists in the correct development of the nervous system, brain, muscles & skeleton.
- In post-weaning and shipping calves, reduced the effects of bovine respiratory disease (BDR) or shipping fever.
- Aids the immune system, relieves arthritis, eases the discomfort of inflammation, aids wound healing, supports a healthy heart and blood circulation.
- Improved hair quality and additional bloom and general appearance.

Additional Information:

- Fresh water, Grass Hay and Salt should be available at all times
- Alfalfa Hay is not recommended
- Free Choice mineral should be available if feed is restricted
